Cowboy Bebop Microsite Updated Notes

- Title typeface should reflect more of the **space western vibe** of the show
- I enjoy the darkness of the Mock-Up A
  - But readability gets dicey with the darkness of the gradient
    - Possible solution: background black, text red
- Page needs closure → footer
- Mobile body copy a little hard to read
  - Picture in mobile perhaps
  - hamburger
- Echo city/neon signage from nighttime urban image in background
- I like the ambition of the sideways navigation bar
  - If you can make it work, great. If not, horizontal works as well.
- **Spaghetti western but make it space.**
