Cowboy Bebop Website

For my Wikipedia article microsite, I want to focus on the Japanese anime *Cowboy Bebop* which ran from 1998-1999. Set to a jazzy soundtrack, the show follows a band of misfits and their adventures as space bounty hunters. *Cowboy Bebop* achieved worldwide critical and commercial success. The site will have multiple pages. Navigation will be situated at the top of the page with clear titles, directing to each individual page. I may also add a footer with navigation links, if content on the page takes up too much space.

- **Home Page -** Introduces the show and a simple premise, accompanied by eye-catching imagery and thoughtful design elements (i.e. color, typeface, etc.).
- **Plot -** Includes a more in-depth premise and list of notable characters.
- **Production -** Lightly touches on the behind the scenes as well as the music.
- **Reception -** Critics' reactions and the show's awards.
- **Legacy -** Highlights the show's influence.
- **Sources -** Includes sources for both copy and photographs.
